

## At a glance..... Household income by multi-member ward, 2015

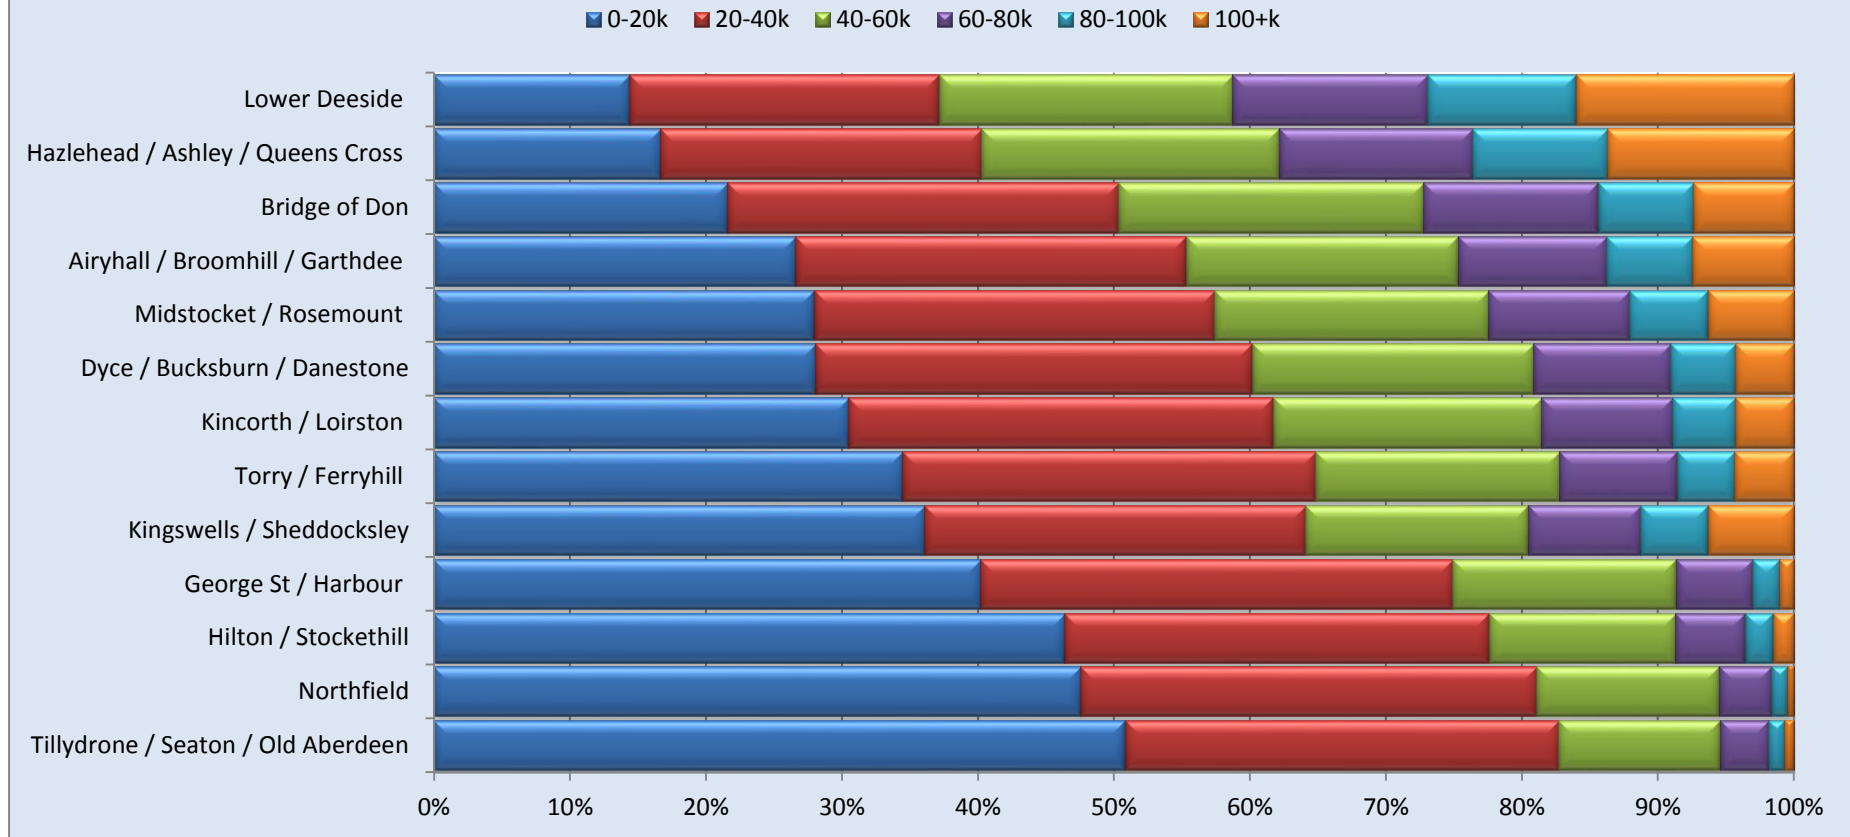

CACI Paycheck provides estimates of household income levels. The estimates are for gross annual household income from all sources including earnings, benefits and investments. This document presents income data for 2015. Two bar charts are presented. The first shows the estimated median household income in each ward. The second shows income levels in each ward. For ease of presentation income levels have been categorised into bands of £20,000 up to a level of £100,000 - with a final income band for £100,000 and over. The bar chart shows the proportion of households within each income band for each ward. A table showing all figures is provided at the end of this document. These charts are intended to provide a quick and easy comparison of household income in different wards. For further information, please contact the Research and Information Team at: [statistics@aberdeencity.gov.uk](mailto:statistics@aberdeencity.gov.uk)
