

Autism Friendly Games at Curriculum Resources and Information Service

The games below can be reserved through Aberdeen City Libraries [online catalogue](#) by adding the title in the Quick Search box and selecting Place Reservation at the bottom of the record.

<p>Colour tactile dominoes</p> <p>These dominoes can be used to compare colours, shapes and textures as well as helping with memory and matching logic. Also great for developing language and fine motor skills.</p>	
<p>Diffraction tube roller shaker</p> <p>The shaker encourages grip and hand flexibility and can be rolled or shaken to create sound. Moving the shaker provides visual stimulation as light is reflected and diffracted.</p>	
<p>Funky footprints game</p> <p>Great for getting children on the move. The Funky Footprints mat counts, makes sounds and cheers as children walk along the footprints.</p>	
<p>Hoberman large sphere</p> <p>This expanding/ contracting ball combines mathematics, geometry and aesthetics in a fun and simple way.</p>	

Hoberman small sphere

This expanding/ contracting ball combines mathematics, geometry and aesthetics in a fun and simple way.

Jumbo beads

Supporting colour and shape matching, the beads can also be threaded to develop fine motor skills.

Mini rainmaker

Create the sound of rain by turning the rainmaker back and fore and watch the colourful beads as they spill down through the discs.

Rainmaker

Create the sound of rain by turning the rainmaker back and fore.

Snoezelen sensory squares

Bright and colourful, these squares can be used for shape recognition, contrasting textures/ weights and sounds.

Sounds kit

An assortment of musical instruments to introduce children to rhythm and music.

Tricky tree; get a grip on balance

This construction game helps children with the concept of balance and also improves fine motor control.

Take it in turns to add the small pegs to the branches of the tree without the tree becoming lopsided and falling over.
