

Babies Granite Memorial Headstones

These memorial headstones are for the bereaved parents of stillborn and young babies who wish their babies to be buried in the special Babies Section of Hazlehead Cemetery.

The Babies Section is located to the left of the car park in the cemetery which is just off the Old Skene Road.

The headstones are approximately 750mm (2'6") high and have three granite posy vases situated at the base of the memorial. There is space for an individual inscription, finished in gold lettering, for each of three families and these inscriptions are limited to three or four lines.

The three families may place a floral tribute in their own individual posy vase. However, floral arrangements should be kept short so that the lowest inscription is not obscured.

A small ornamental motif may be inscribed alongside the inscription. A choice of three motifs is available, a cross, an angel or a teddy bear.

Following the initial erection of the headstone and first inscription, the headstone may have to be removed to inscribe either the second or third inscription. The cost of the purchase of a three line inscription includes a proportion of the total cost of the headstone. There would be an addition to this cost if a motif or a fourth line is also required.
