

Seed germination without compost instructions

Items needed

- Plastic container with sealable lid
- Paper towels, seeds of your choice and water

Steps

1. Place one paper towel at bottom of the plastic container, fold paper if necessary. Wet paper towel with water make sure to not over water and create little puddles.
2. Spread seeds evenly across wet paper towel.
3. Take another paper towel and press down very carefully try not press the seeds.
4. Water the top paper towel until moist. Try not to over water.
