

## Net Zero Aberdeen Routemap

### **Statement of Reasons for Screening Determination**

Although the intention is that the Net Zero Aberdeen Routemap will act as an overarching guide to how the City of Aberdeen will achieve net zero emissions by 2045, it's aims and objectives are very high level.

This iteration of the Routemap does not propose specific projects nor does it discuss location, nature, size or operating conditions, as such it is not possible to determine if significant environmental effects are likely.

The Routemap promotes sustainable development as this is part of achieving net zero emissions by 2045. It does this in very general terms and is not likely to result in any environmental problems.
